Bon Vista
Frontend Developer

I am a passionate and detail-oriented Frontend Developer with 5+ years of experience creating engaging, user-centric web applications. My expertise lies in transforming complex design concepts into intuitive, responsive interfaces using HTML, CSS, and JavaScript. I have a strong foundation in modern frameworks like React, Angular, and Vue.js, which enables me to build high-performance applications with clean, maintainable code.

Experience

○ **October 2021 - July 2024**
Radius Telecom | Pasig
Senior Frontend Developer

- **Develop React Components**: Build and maintain reusable, modular components and front-end features using React JS.
- **Collaborate with Teams**: Work with UX/UI designers and backend developers to create seamless and visually appealing user interfaces.
- **State Management**: Utilize state management tools such as Redux or Context API to manage application state efficiently.
- **Optimize Performance**: Implement performance optimizations and ensure fast, responsive, and scalable web applications.
- **Code Quality**: Write clean, maintainable code following best practices and coding standards.
- **Testing**: Develop and execute unit tests and end-to-end tests to ensure code reliability and performance.
- **Debugging**: Troubleshoot and debug issues in the development and production environments.
- **Integration**: Integrate with RESTful APIs and other web services to fetch and manage data.
- **Documentation**: Document code, processes, and design decisions for future reference and team knowledge sharing.

October 2019 - September 2021
Ad-Lib.io | UK Based Company
Frontend Developer

- **Develop and Maintain User Interfaces**: Build and maintain the front-end components of web applications using HTML, CSS, and JavaScript.
- **Collaborate with Design Teams**: Work closely with UX/UI designers to implement and improve design prototypes and layouts.
- **Optimize Performance**: Ensure that applications are optimized for maximum speed and scalability.
- **Cross-Browser Compatibility**: Ensure that applications work seamlessly across various browsers and devices.
- **Write Clean Code**: Follow best practices and coding standards to write clean, maintainable, and efficient code.
- **Integrate APIs**: Work with backend developers to integrate APIs and other web services.
- **Debug and Troubleshoot**: Identify and fix bugs or issues that arise during development or after deployment.
- **Stay Updated**: Keep up-to-date with the latest industry trends and technologies to ensure modern, effective web development.
